Every year, students at Harrison Morton host a career fair to learn about opportunities for their future. They invite members of the community: lawyers, doctors, construction workers, nurses and more to share what they did to find the career they chose. I participated in this year’s fair and really enjoyed the enthusiasm the students brought to the day. We’ll be in good hands someday.

The U.S. Constitution requires a census of everyone living in the United States to be conducted every 10 years. Each year, approximately $675 billion in federal funding is distributed to States to be conducted every 10 years. The results of the 2020 Census will be used to determine education, health care, social services, improvements, public transportation, communities to pay for transportation improvements, public transportation, education, health care, social services and more. The results of the 2020 Census will be used to determine allocation of those resources, redraw legislative districts and help to decide where children go to school. It is crucial for our community to ensure every person living here is counted. To make sure everybody is counted, the U.S. Census is hiring staff to conduct counts. Staff is needed to canvas neighborhoods to verify addresses and talk to people to get an accurate head count. For more information about job opportunities, visit www.2020census.gov/jobs.

I look forward to working with the U.S. Census and other elected officials to ensure our community is fully counted. Too much is at stake to miss even one person.
